

Maths of the week

Problem Solving

We will be solving lots of different types of problems this week.

We will be focusing on the language of the problems, particularly which word tells us what to do!

There are 10 plants at the garden centre and 4 in the trolley, how many are there **altogether** ?

I have 20p in my purse and buy a plant for 5p. How much money do I have **left**?

I have 10 plant pots. I to **share** these with my sister. How many do we have each?

If there are 5 seeds in the packet and I buy two. How many do I have **altogether**?

Also remember to keep practising counting, recognising, ordering, writing, saying 1 more, 1 less, adding and taking away numbers to 20 and beyond.
