E-safety Newsletter December 2025

Discord

Discord is a social networking app originally designed for gamers but is now used by lots of different people to **chat to each other online**. The minimum age to access Discord is 13. The App store rates it as 17+.

Discord is made up of servers, which are spaces for groups to chat, upload files and share images etc. Anybody can set up a server, and they can either be

public or private. Users can video call and send direct messages to other individuals or groups. Children who play online games such as Fortnite may use Discord to chat whilst playing the game (**rather than using the game's own chat facility**). In-app purchases are available through Discord's subscription service called Nitro

How can I make it safer?

Discord have created a Family Centre, which provides further information about what Discord is, as well as information about different safety settings available:

<https://discord.com/safety-familycenter>

As always, we would encourage you to chat to your child to see why they use Discord and ensure that they know how to block users and what to do if they see any inappropriate content. It is important to be aware that Discord does include video/voice calling which cannot be filtered. **Discord is used by an array of users and therefore adult content can be found on Discord as well as inappropriate language.** Discord have produced this article, which answers frequent questions: <https://discord.com/safety/360044149591-answering-parents-and-educators-top-questions>

New Technology

As some children may be receiving new technology or related games at Christmas, here is a quick reminder of the importance of setting up appropriate parental controls.

Games/Consoles

- Check age ratings: look at the PEGI rating of any new games. *Remember, PEGI rates the gameplay so whilst it is important to review age ratings, you must also check to see if it has any communication elements.*
- If a game does allow your child to communicate with others, then adjust or disable the settings as appropriate to your child.
- On the device itself, set up applicable controls such as restricting spending limits. Follow the links below to find out how to set up Parental Controls for popular devices here:

Xbox: <https://www.xbox.com/en-GB/family-hub>

PS5: <https://www.playstation.com/en-gb/support/account/ps5-parental-controls-spending-limits/>

Nintendo Switch: <https://www.nintendo.com/en-gb/Hardware/Nintendo-Switch-Parental-Controls/Nintendo-Switch-2-Nintendo-Switch-Parental-Controls-2873385.html>

Tablets/Smart phones

Set up parental controls on the device to prevent purchases, restrict content viewed and adjust privacy settings. Furthermore, remember to check any apps your child requests to check that they are suitable for their age. Follow the links below to find out more:

iPhones/iPad: <https://support.apple.com/en-gb/105121>

Android Device: <https://support.google.com/googleplay/answer/1075738>

AI Chatbots and companions

A simple search of "AI Chat" within the App store highlights the number of AI apps already available, many are rated as 18+ so it is important to speak to our children about them and the risks associated with them. Examples of AI chatbots that your child may have heard of are Character.AI (18+) and My AI from Snapchat (13+).

What are the risks?

- Over reliance on AI companions, for example they may replace 'real life' friendships or over reliance on using them for homework or problem solving.
- Exposure to inappropriate content.
- Privacy/data risks.
- Misinformation as not all information shared is correct and can be biased.

How can I protect my child?

- Check age ratings of any apps or websites that your child accesses.
- Discuss the risks of AI chatbots with them and have open conversations about why they may be using them.
- Set up appropriate parental controls on their devices/ broadband.
- Chat to your child regularly and ensure your child knows that they should talk to you or another trusted adult if anything concerns them.
